

FALCON MACHINERY | ADDITION

Location. **Winnipeg, Manitoba**
Industry. **Industrial**
Area. **6,103 sq.ft**

Falcon Machinery is primarily a custom metal fabrication company. They offer metal processing services such as saw cutting, machining, plasma cutting, welding, etc. They also have a hot-dip galvanizing facility.

We did a 6,103 sq.ft addition making the overall building 46,262 sq.ft, along with a renovation of some existing office space. The project consisted of a shop expansion, new lunchroom, renovated locker rooms, open office space, private offices and renovated reception area.

In addition, our in house design team worked directly with the client to establish an interior color scheme, choosing all finishes from paint, to flooring, millwork and hardware.

On time. On budget.
